

Insect Pest Identification Request

Please ensure that the insect specimen is packed appropriately:

- *Place in a container which will not be crushed in the post*
- *Make sure any live specimens cannot escape*

Send to:

Jeanne Robinson Hunterian Museum (Zoology) Graham Kerr Building University of Glasgow G12 8QQ	
Name of person making request	Address Email Phone
Is the specimen dead/alive?	Larva or adult?
Give details of where and when specimen was found	
Specimens will not normally be returned and will be retained by the entomologist (please provide suitable SAE if you do wish to have specimen returned)	Any further comments or notes to add?
Entomologist's notes Dated received: ID of specimen:	
In order to help us understand IPM training needs in Scotland it would be helpful if you tell us the following: How much Pest ID training have you had? none a little regular training Does your institution have an IPM programme? yes no don't know lapsed	

This form was developed by conservators and entomologists to assist with the identification and control of insect pest species in Scotland. Please distribute freely. This version: Sept 2015.
